User Instructions for the
VIP-327-SP "MouseFlipper"™ Mouse Format Converter,
Serial to PS/2

FEDERAL COMMUNICATIONS COMMISSION

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at their expense.

CE

This equipment has been tested and found to conform to the directives and standards for a Class A Information Technology Equipment type and for the Commercial and Light Industrial equipment class.

INTRODUCTION

The VIP-327-SP "MouseFlipper" Mouse Format Converter allows a serial mouse to be connected to the PS/2 mouse port of a PC.

PREPARE FOR OPERATION

There are two steps to prepare the Format Converters for operation.

ALL CONNECTIONS SHOULD BE MADE WITH THE PC POWER OFF!!

1. Connect the PC: Use the male/male DIN 6 pin cable supplied with the unit to connect the Converter at connector marked “TO PS/2 MSE PORT” to the PC’s PS/2 mouse connector.

2. Connect the Mouse: Use the serial mouse’s cable to connect the mouse to the DB9 cable connector on the Converter marked "SERIAL MOUSE IN".

Now the PC can be powered on.
